Lacentralina is configured n order to automatically attach to a wifi network with:
　　　SSID: LacentralinaHotSpot
　　　Password: aGrisu2017

You can set your router or your mobile phone in order to provide such network. Please refer to your mobile phone or to your router user manual.

If any Wifi network is not available, Lacentralina will turn into a WiFi Access Point for 10 minutes. Therefore you have time to configure Lacentralina to attach your own network.

Search for the "*LacentralinaV5*" network. The password is "*aGrisu13*"
Open a browser (on your PC or mobile) and digit the address: *10.0.0.254*

You will access the Lacentralina Homepage:

aGrisu' - Lacentralina 5

Environmental indoor monitoring unit

Know the air you breathe!

Lacentralina can be installed in indoor spaces, where it communicates directly with the building control unit to operate the air conditioning, opening windows or send reports to abnormal situations. Lacentralina is perfect for monitoring the environment in homes built according to sustainable building criteria, in museums, to monitor production activities in small industries, medical laboratories or to highlight the quality of air in hotel room. The unit is also suitable for intensive use for monitoring, for example, of greenhouse cultivations, during restoration of cultural heritage. The control unit can monitor an area of about 30-50 m2.

Config WiFi

Download log file: « acquistionLog.csv »

Click on Config Wifi, in the bottom left corner.
Type SSID and Password of your network.

WiFi Config Page

Actual WiFi Configuration:
SSID = LacentralinaHotSpot
PASSWORD = aGrisu2017

....

New WiFi Configuration:
SSID:
PASSWORD:
Connect

....

Go Back

Click on connect. Lacentralina will save the credentials and reboot. If the configured network is available ALcentralina will connect automatically. You can access the menu by accessing the new address given by the DHCP server of your router. Please access the router to check it.

If you want to modify the configuration you can either:
1) Access the menu by the address provided by your router
2) Turn off your router and access the LacentrlainaV5 hot spot on address 10.0.0.254
